

BUSINESS SALES PERFORMANCE ANALYTICS REPORT

Objective:

To analyze business sales data and identify revenue trends, top-selling products, high-value categories, and regional performance.

Dataset Overview:

The dataset contains sales transactions across multiple product categories including Electronics, Furniture, and Stationery from different regions.

Key Performance Indicators (KPIs)

1. Total Revenue

Total Revenue Generated: ₹483,000

2. Top-Selling Products

- Laptop: ₹200,000
- Mobile: ₹160,000
- Printer: ₹54,000

3. Category Performance

- Electronics: ₹474,000
- Furniture: ₹57,000
- Stationery: ₹12,000

Electronics is the highest revenue-generating category.

4. Regional Performance

- South Region: ₹156,000
- North Region: ₹156,000
- East Region: ₹114,000
- West Region: ₹57,000

South and North regions are the best-performing regions.

5. Revenue Trend

Revenue remained strong throughout the observed period, with Electronics products contributing the majority of total sales.

Business Insights

- Electronics products drive most business revenue.
- Laptops and Mobiles are the most profitable products.
- Stationery contributes minimal revenue and may require promotional strategies.
- South and North regions should receive additional marketing investment.

Recommendations

1. Increase inventory for Laptops and Mobiles.
2. Focus marketing campaigns on high-performing regions.
3. Improve sales of Stationery products through discounts and bundles.
4. Monitor monthly sales trends using dashboards.

Conclusion

The analysis shows that Electronics is the key revenue driver. Strategic focus on top-performing products and regions can further improve profitability and business growth.
